SERVICES

Our major advantage is comprehensive offer of metal reshaping, possibility of mounting final products in and surface protection of metals, accompanied by good business relations – the company has been working for more than 15 years with our major partners and customers.

- Laser cutting
- Sheet metal cutting and bending
- Robotic welding
- Sheet metal punching
- Curving profiles and tubes
- Welding of INOX, ALU and Fe materials
- Powder painting in cooperation
- Constructions
- Installation

Laser cutting

Laser cutting technology enables us to achieve desired results in a much shorter time.

We consider sheet metal laser cutting as the newest acquisition in our manufacturing activities where laser cutting technology allows unlimited width of materials (Fe, Rf, Al), various thicknesses (up to 20 mm) with up to 0.1 mm accuracy.

Most importantly, the technology allows quick, simple and cost-effective solutions for your ordered product. Quality of the service is assured, just send us your project in DXF format on our e-mail address, we will prepare you an offer for your ordered product, followed by a laser cutting program.

In our company we cut, bend, punch and weld. Quality of all services, implementation in agreed time limit and extent is our prime concern. Customers appreciate flexibility, innovativeness and originality in finding proper technical solutions. In our company all activities are done in our own manufacturing facilities and on up-to-date CNC machines that can handle all kind of metals.

PRODUCTS

Main products of our company are indoor and outdoor metal equipment, visual-communication systems, fireproof elements and products of building locksmith's trade (made of Fe, Alu and Inox materials):

- advertising boards,
- fire escape doors,
- metal equipment,
- metal constructions,
- sheet metal products.

Advertising boards

In past few years, we have paid special attention to the development of advertising boards for indoor and outdoor designation of structures. Based on integrated graphic image, customers' inquiries and demands, we offer engineering, manufacturing and assembling of advertising boards for business, trade and manufacturing structures.

A team of experts will be able to advise and prepare solutions in full sphere of design, construction, electrical and assembling solutions.

We design, manufacture, assemble:

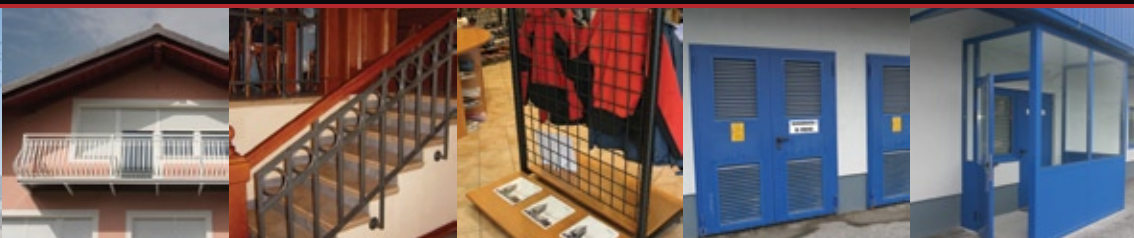

- illuminated or non-illuminated single or double sided advertising boards
- self standing letters in illuminated or non-illuminated version,
- pointers, totems, poles and pictograms in illuminated or non-illuminated design
- lighting cassettes, borders and brackets with inscription surface made of linen, Plexiglas or Aluminum,
- illuminated or non-illuminated roadside designation boards.

Fire escape doors

We produce all kinds of fire escape doors and walls in FORSTER system in glass or common implementation that can be installed on border of fire and/or fume sectors or on evacuation paths.

We have acquired Slovenian technical agreement for all Forster fire door systems (Forster PRESTO 50 E 30, Forster FUEGO LIGHT EI 30, Forster FUEGO LIGHT EI 60).

We also deliver and build-in fire and common NINZ doors.

Metal equipment

- Urban equipment
- Shop equipment
- Fence elements
- Small metal fancy goods

We produce and assemble metal equipment for ELAN INVENTA sports halls.

Metal constructions

We project, manufacture, assemble and mount various medium and heavy weight metal constructions, projecting roofs above entrances, projecting roofs for cars, industrial and fire escape staircases and other similar products in painted or hot Zn plated design.

Sheet metal products

We produce various sheet metal products, such as metal sheet metal containers, cabinets and stands upon order, however, there are also some similar products in our own program.

We are specialized in three basic manufacturing programs:

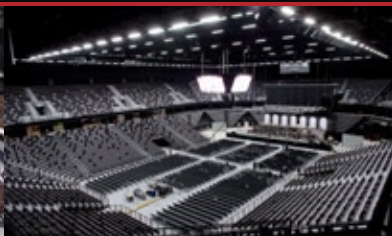

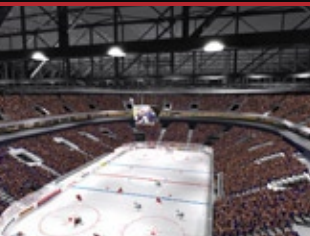

- indoor metal equipment program,
- light metal constructions program,
- integrated graphics image program for products for structures.

Our offer also includes a wide palette of services of re-shaping sheet metals and profiles on up-to-date CNC machines.

We continuously follow technological progress and modernization of our manufacturing.

Besides products, are also offer design, consulting and assembling in field to our customers.

We have all necessary conformances and certificates for our products. All business is certified according to ISO 9001/2000 standard.

CERTIFICATES

Quality certificates

according to ISO 9001:2000 standard, area of locksmith's trade and machine re-shaping of metals.

Welding certificate

acc. to ISO 3834-4.

Certificate on compliance

for fire escape doors with sidelight and over light for Foster Presto 50 E 30, Foster Fuego Light EI 60 and Foster Fuego Light EI 30 systems.

Slovenian technical conformance

for fire doors with sidelights and over light for Foster Presto 50 E 30, Foster Fuego Light EI 60 and Foster Fuego Light EI 30 systems.

Certificate on conformance

permanently installed lamps – light advertising SKP boxes,

Certificate for advertising boards' illumination

SIQ certificates upon LVD, EMC and CE directive for illuminated advertising board illumination with LED modules, in accordance with the »Decree on limit values due to light pollution of environment«.
